

Sexual Health Training

The Renfrewshire Health Improvement Team are working with Scottish Drugs Forum to deliver 2 x half days of training around Sexual Health.

This training is for staff working with vulnerable adults within the local community as well as public sector service staff.

We have grouped staff together under the themes of Mental Health & Well Being, Addictions, Housing/Homelessness and Criminal Justice as we think that the training will serve as a good networking opportunity.

Across the 2 half day session, staff will learn about Sandyford Services, Consent, Contraception Options, HIV, BBVs and STIs.

Training is available from February until the end of the year across Renfrewshire. To sign up to this training (courses for staff working within Mental Health will start in February) and to find out more information please contact Jane Kelly on 01505821811 or email jane.kelly3@ggc.scot.nhs.uk.
