## Footpaths closed: 7 July 2019

As part of our ongoing works, starting on 7 July we will be carrying out hydrostatic pressure testing on our Erskine Bridge replacement pipeline. We will be testing the entire length of the new pipeline which runs from Station Road, Kilpatrick Braes, Old Kilpatrick to Boden Boo Community Woodland, Erskine. During the test, footpaths, roadways and canal banks will be monitored and patrolled. Some parking restrictions will also apply.

The test itself will be carried out for a minimum of 24 hours, and we need to allow for additional set-up time beforehand and to depressurise afterwards.

During this time, an exclusion zone needs to be placed around the pipeline therefore the footpaths will be closed at the locations shown opposite:

## Station Road Footpaths Closed 7 July 2019

As part of our ongoing works, starting on 7 July we'll be carrying out hydrostatic pressure testing on our Erskine Bridge replacement pipeline. We'll be testing the entire length of the new pipeline which runs from Station Road, Kilpatrick Braes, Old Kilpatrick to Boden Boo Community Woodland, Erskine. During the test, footpaths, roadways and canal banks will be monitored and patrolled. Some parking restrictions will also apply.

The test itself will be carried out for a minimum of 24 hours, and we need to allow for additional set-up time beforehand and to depressurise afterwards.

During this time, an exclusion zone needs to be placed around the pipeline therefore the **footpath** between **Mount Pleasant Drive** and **Braes Road** will be **closed**. However, the road will remain open with four-way traffic lights and a **courtesy bus** will be available for any pedestrians wishing to pass the test area.

## Lusset Park Park Closed 7 July 2019

During this time, an exclusion zone needs to be placed around the pipeline therefore the **park** will be **closed** except for pedestrian access to Kilpatrick Station, the Erskine Bridge and the two disabled parking bays for Kilpatrick Station.

For further information, please visit:
