

Vodafone Techstarter

Funding and mentoring for UK non-profit and for-profit social tech start-ups and early-stage ventures (social businesses, charities, social enterprises and CICs) to develop innovative technology solutions with social purpose, from prototype to market readiness.

Fund Information

Funding body: Social Tech Trust

Maximum value: £ 35,000

Application deadline: 23/10/2018

Background

Vodafone Techstarter is provided by the Vodafone Foundation in partnership with Social Tech Trust.

Objectives of Fund

Vodafone Techstarter offers UK-based social tech ventures the chance to secure funding and gain access to expertise to help take transformational ideas from start-up to scale-up.

The programme aims to uncover and develop innovative ideas that can harness the power of technology, connectivity and innovation to improve health and wellbeing, education, environmental protection or social mobility and inequality. Funding and expert guidance will be provided in areas of key technologies, such as Internet of Things (IoT), 5G, digital services and infrastructure or in areas, such as commercial development.

Overall, the scheme will contribute to the need for industry support to help take commercial and not-for-profit minimum viable products to market readiness and scale.
