

‘Our country is finally at an understanding of the lifelong consequences of childhood trauma. We are beginning to think more innovatively about what needs to be done to prevent it and to heal it.’

We are very excited to be holding a screening of ‘Resilience: The Biology of Stress and the Science of Hope’ on **Wednesday 7<sup>th</sup> March** from **9.30am until 1pm** at the **Tannahill Centre**, 76 Blackstoun Road, Paisley, PA3 1NR. As you may be aware, this is a trail-blazing documentary looking at the links between Adverse Childhood Experiences (ACEs) and lifelong health and social problems.

This screening is for staff and volunteers working in Third Sector organisations and will be followed by a panel discussion and networking lunch.
