

Helping People Make Good Things Happen

We are working on a project with Shelter Scotland and are looking to get people's views on their training services. We'd be grateful if you could disseminate the survey we created to your members. Below is the text we have agreed with Shelter Scotland.

"Shelter Scotland has been delivering training to the housing sector across Scotland for many years. While their programmes have evolved and changed, Shelter Scotland's training still enjoys significant demand. Nonetheless, the team are keen to enhance their offering and consider new markets, new products and different ways of working. The organisation has therefore contracted Community Enterprise Ltd to undertake an in depth review of the needs of the sector and how Shelter Training can change to better meet that need. If you work in housing, health, social care, homelessness, or related areas (e.g. welfare benefit support, money and debt advice) we would be grateful if you could complete the following short survey to help shape the future of Shelter Scotland's training provision:

https://www.surveymonkey.co.uk/r/Shelter_Training_Survey"
