

Developing the Public Health Priorities for Scotland **Engagement Events – Hold the Date**

Led by Scottish Government and COSLA, a set of public health priorities for Scotland is being developed, as an important part of the overall public health reform programme currently underway.

The Scottish Public Health Network (ScotPHN) is organising 3 regional engagement events, which will be interactive and focussed on workshop discussion. As a member of the Public Health Oversight Board, VHS's Chief Officer Claire Stevens would like to encourage as many VHS members and other third sector organisations to attend one of these engagement events.

We will forward you the registration details early in January 2018, but meantime please hold your preferred date in your diary.

Edinburgh 12 Feb 2018 10am - 3pm CoSLA Building Verity House	Aberdeen 21 Feb 2018 10am - 3pm Hilton Doubletree	Glasgow 27 Feb 2018 10am - 3pm Royal Concert Hall
---	--	--

It is really important that the Scottish Government, COSLA and ScotPHN obtain a broad perspective and range of views from partners in local authorities, the third sector, community planning, health and social care partnerships and Integrated Joint Boards, as well as the specialist public health workforce.

Information on the events can be found on the [ScotPHN website](#).
